INVITATION

The International Conference on Pure and Applied Chemistry (ICPAC 2010) will be held on July 26-30 2010, in Mauritius.

Chemistry is one of the subjects of Science for understanding and explaining makeup and changes of everything that has mass and occupies space. Chemistry has permeated the study of different branches of Science. Therefore, Chemistry has an important role for sustaining development. The Organising Committee has adopted the theme "Chemistry for Sustainable Development" as Chemistry and technological advances can help to improve the conditions of Mankind. The program of this green conference will feature a wide variety of plenary and contributed lectures, as well as poster sessions. This conference will provide a platform for participants to share and discuss latest findings of their research.

It will also be an opportunity for participants to visit the island of Mauritius, famous for its sun, sea and sand.

The Organising Committee would like to welcome academics and researchers in all fields of Chemistry in this conference.

Ponnadurai Ramasami
Chairman of the Organising Committee
